

MSSPs POWERED BY CROWDSTRIKE

Provide the highest level of security to your customers by seamlessly incorporating the best endpoint, cloud, identity and data security solution into your managed services stack

EMPOWERING MANAGED SECURITY SERVICE PROVIDERS (MSSPs) TO STOP BREACHES

The CrowdStrike Falcon® platform gives MSSPs a cloud-delivered endpoint, cloud, identity and data security solution that is easy to deploy and manage at scale while providing the highest level of security for their customers.

Implementation and proper configuration of security technology tailored to each customer's security needs can be complex. The CrowdStrike solution solves this by providing tools to deploy and manage customers through automated provisioning, simplified policy and customer-level management.

The threat landscape is ever-evolving, and attackers are increasingly sophisticated. MSSPs powered by CrowdStrike allow you to gain a complete view of all customer environments via a single console to detect and respond effectively to all types of attacks.

Access to real-time visibility is key for MSSPs to quickly determine the nature and scope of a threat and immediately respond to an incident.

Falcon for MSSPs reduces the overhead, friction and operational costs associated with configuring and managing an endpoint solution, while providing the most comprehensive endpoint, cloud, identity and data security.

KEY BENEFITS

Reduces the burden of operationalizing, maintaining, configuring and optimizing endpoint, cloud, identity and data security

Protects endpoints across all leading OS platforms and against all types of attacks

Provides cloud protection across three major cloud providers: AWS, Google and Red Hat

Enables immediate and effective prevention and detection of threats

Takes quick and effective action to triage and remediate across your entire environment

MSSPs POWERED BY CROWDSTRIKE

THE EASIEST WAY TO PROVIDE COMPREHENSIVE SECURITY TO YOUR CUSTOMERS

Traditional endpoint security solutions can be complex, requiring significant resources from MSSPs to deploy and manage. The Falcon platform simplifies this process to offer the most comprehensive endpoint, cloud, identity and data security solution to MSSPs.

KEY PRODUCT CAPABILITIES

PROVIDE YOUR CUSTOMERS WITH THE BEST SECURITY PLATFORM

- Best in class:**
 CrowdStrike Falcon provides immediate and effective prevention and detection against all types of attacks, with comprehensive visibility and aggregated threat detections to accelerate threat investigation and remediation.
- Streamlined operational efficiency:** CrowdStrike Falcon is a multi-tenant, cloud-native platform that is the best choice for MSSPs because it helps reduce the burden of operationalizing, maintaining, configuring and optimizing endpoint, cloud, identity and data security.
- World-class expertise:**
 CrowdStrike Falcon includes the support of a skilled team of security professionals with cybersecurity expertise to operate as an extension of your team to hunt threats, offer technical and strategic advice, and provide training.

COMPARE FALCON MSSP BUNDLES

MSSP Protect	MSSP Defend	MSSP Advanced Defend
Falcon Prevent™ next-generation antivirus	Falcon Prevent	Falcon Prevent
Control and Respond	Falcon Insight™ endpoint detection and response	Falcon Insight
	Threat Graph® 7/15/30	Threat Graph 7/15/30
		Falcon OverWatch™ managed threat hunting

ADDITIONAL MODULES AVAILABLE TO MSSPs

Cloud Security	Identity Protection	Security and IT Operations	Log Management and Observability
Falcon Horizon™ cloud security posture management	Falcon Identity Threat Detection™	Falcon Discover™ IT hygiene	Falcon LogScale
Falcon Cloud Workload Protection™	Falcon Identity Threat Protection™	Falcon Spotlight™ vulnerability management	Falcon Long Term Repository

BUILT FOR THE WAY MSSPs DO BUSINESS

Self-service portal: Enables MSSPs to provision new customers via the CrowdStrike Partner Portal.

Custom deployment groups: Allows for automatic policy propagation across an entire environment.

MSSP-specific bundles: Enables MSSPs to provide comprehensive endpoint security customized to their customers' needs.

ABOUT CROWDSTRIKE

CrowdStrike (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform enables customers to benefit from rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.
